About the presentation

You will never get a second chance to create a good first impression. Our attitude determines the altitude in reaching the goal. Self-development implies getting self-motivated to become self-disciplined to commence the self-development journey.

Develop a positive attitude, ensure the company of positive people, read good books that provide positive motivation, be active be pro-active, feed your mind with confidence filling thoughts, be soft spoken with crystal clear communication, improve your self-esteem, self-image and thus your self-confidence which leads to self-development and all round development. Model yourself after successful people, Conquer doubt, fear and anxiety and also control anger. Finally exercise and meditate to keep going and growing.

In communication what you know is not important, what you say is less important but how you say all that matters. Only 7% is the verbal communication and the remaining is non-verbal communication. You need to communicate differently with different people such as parents, teachers, brothers, sisters, friends, customers, etc.
