Founder's Message

To all parents,

Are your children GRASSROOTERS OR PARACHUTERS? There was a successful circus company which owned ten tigers and owners feed the animals well and animals got easy meals without any efforts. Due to heavy loss, owners closed the company and left ten tigers in a forest After few days they received a message all ten tigers died because dogs killed them. Because the forest dogs are exceptionally good in hunting.

MY MESSAGE TO YOU:-

When we let our children inherit with huge assets, we are making them as tigers. We are destroying the killer instinct. They lose the ability to hunt their own prey. The vast majority of them do not have discipline, wisdom, emotional intelligence, and spiritual quotient to oversee your wealth. And we cannot expect a strong character from them. You do not lose your objectivity while parenting and don't handicap kids in the name of affection and care. GRASSROOTERS are driving force behind their own destiny. PARACHUTERS who inherit a large fortune from parents lose their hunting skill can only come down. Are your children GRASSROOTERS OR PARACHUTERS? You may share with your friends.

You parents... think and decide.
